About Me

CSE student at AIUB who actually builds things instead of just talking about it. I work with modern stacks like React, Tailwind, Node.js, and MongoDB to create clean, responsive apps. I enjoy solving real problems, optimizing systems, and designing intuitive user experiences. Always leveling up, always shipping projects.

Skills

Programming Languages: C++, JavaScript, PHP, C#

Web Development: React.js, JavaScript, Node.js, HTML, CSS, Bootstrap, Tailwind, MongoDB, Firebase

Database Management: MySQL, MongoDB, PostgreSQL

Education

Bachelor of Science in Computer Science and Engineering
American International University-Bangladesh
2022 - 2025

Projects

Khushbu React E-commerce

- E-commerce web app built with React (Vite) & Firebase
- Modern, responsive UI with Tailwind
- Product browsing, filtering & cart
- Admin panel with product upload + orders
- Firebase Auth & React Query integration
- [View Project Live](#)

Hotel Room Booking System

Full-stack hotel booking web app built with Next.js & Node.js

- Modern, responsive UI with Next.js (App Router) + Tailwind CSS
- Room management: create, edit & delete rooms
- Real-time room booking with availability handling
- REST API built using Express + MongoDB (Mongoose)
- [View Project Live](#)

E-commerce Backend

Scalable REST API built with Node.js, Express & MongoDB

- JWT-based authentication with role-based access (user/admin)
- Secure password hashing using bcrypt
- Product, cart & order management APIs
- Protected routes with middleware authorization
- Built for frontend integration (React / Next.js ready)
- Ongoing project with extensible architecture
- [View Project Live](#)

Perfume Shop

- A perfume shop website to showcase my projects and skills,
- built using React.js, tailwindcss,
- [View Project Live](#)

FootLive

Full-stack football stats & news app built with Next.js

- Live football league standings by season & league
- Curated football news with incremental revalidation
- Full-stack setup using Next.js Route Handlers (API proxy)
- Modern UI with React + Tailwind CSS
- External data powered by API-Football (RapidAPI)
- Single repo for frontend + backend logic
